

Indigo Class Maths lesson using Google Classroom

- By 9:40am I will ensure that the 'meeting link' is visible for your child in the 'Indigo Class' bar at the top. I will also post the link on the stream.
- Before joining the meeting, please ensure your child has a pencil and paper to record their answers on.
- When your child has joined the meeting, we will wait around five minutes to allow everybody to join. This will be a chance for the children to see each other and for me to ensure that they are all muted and ready to start.
- Once we are ready, I will 'present' the PowerPoint. Your child will be able to hear me talk over it. I will take them through the slides and they will be asked to have a go at questions. They are used to the Big Maths PowerPoints so after the first few sessions they will get into the routine of it.
- Once we have finished the slides, I will tell your child to end the meeting and go onto their 'classwork'.
- On their classwork there will be tasks to complete each day.

Main Maths Activity

After your child has taken part in the meet session, they will have their assignment set. This will be worksheets with 10 questions on each. Please complete the sheets in the following order:

Repeat
Revisit
Real Life

N.B. The answers are also provided so the children can self-mark.

Your child will have options on how to show me what they have done:

Upload either:

- a picture of your answers (right hand corner it says 'add or create')
- write your answers onto a word doc. (right hand corner it says 'add or create')

A few reminders for the live meet session:

- Please remind the children to only use the 'raise hand' tool if there is a real issue that they need my help with or they have a question.
- If the child is muted, make sure they only unmute themselves if they have been asked to.

Thank you so much. Any questions please ask me on Dojo.
