

Red Class News

Friday 5th July 2019

It has been another great week in Red Class, following the excitement of Mazey Day we have settled back in our regular learning by looking at our new habitat—The grasslands. The children have been particularly focussing on lions and learning about how they live in this environment. In maths we have been following up our work on halves by looking at doubling numbers. The children have been fantastic and we even looked at the links between doubling and halving. Next week we will continue our animals topic by looking 'under the sea'!

Mazey Day

Thank you for all of your fantastic support at the parade last weekend. The children clearly had an amazing time!

Warm weather information:

As the weather is getting warmer, we are explaining to the children how to stay safe in the sun. To assist with this could you please check that your child has a hat in school, a named water bottle and their own sun cream. The vast majority of the sun creams we have in school do have names on but there are several that don't and in this instance we cannot apply sun cream to children if the bottle has no name on.

Parent's day

Thank you for your responses regarding Parent's day on the 8th July. The slips with the appointment times have now been sent out and were placed into book bags on Wednesday. I have tried where possible to keep to everyone's first choice, particularly if there are siblings in school with similar times but if there are any issues at all please come and see me and I will try and work something out.

Library books

Over the course of the next week we will be taking back library books in time for the end of the year. There will be no new library books given now until September. Please ensure that all library books at home are in book bags to be collected in.

Maths weekend challenge:

Can you find 4 objects and double them?

Weekend challenge:

Can you tell a grown up a fact about lions?

Have a lovely weekend,

Mr Savage, Miss Graham, Mrs Rudlin and Miss Reeves.
