

Key Instant Recall Facts Year 3 Summer Term

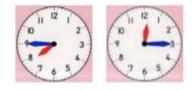

I can tell the time.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts instantly.

Children need to be able to tell the time using a clock with hands. This target can be broken down into several steps.

- I can tell the time to the nearest hour.
- I can tell the time to the nearest half hour.
- I can tell the time to the nearest quarter hour.
- I can tell the time to the nearest five minutes.
- I can tell the time to the nearest minute.

<u>Top Tips</u>

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You do not need to practise them all at once; perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

Talk about time - Discuss what time things happen. When does your child wake up? What time do they eat breakfast? Make sure that you have an analogue clock visible in your house or that your child wears a watch with hands. Once your child is confident telling the time, see if you can find more challenging clocks e.g. with Roman numerals or no numbers marked.

Ask your child the time regularly – You could also give your child some responsibility for watching the clock : "The cakes need to come out of the oven at twenty-two minutes past four exactly." "We need to leave the house at twenty-five to nine.

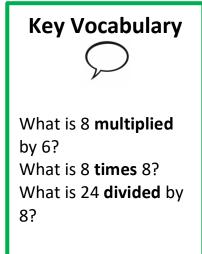

Key Instant Recall Facts Year 3 Summer Term

I know the multiplication and division facts for the eight times tables.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts instantly.

8 × I = 8 I × 8 = 8 8 ÷ 8 = 1 $8 \div 1 = 8$ 8 × 2 = 16 2 × 8 = 16 16 ÷ 8 = 2 16 ÷ 2 = 8 8 × 3 = 24 3 × 8 = 24 24 ÷ 8 = 3 24 ÷ 3 = 8 8 × 4 = 32 4 × 8 = 32 32 ÷ 8 = 4 32 ÷ 4 = 8 $8 \times 5 = 40$ $5 \times 8 = 40$ $40 \div 8 = 5$ 40 ÷ 5 = 8 8 × 6 = 48 6 × 8 = 48 48 ÷ 8 = 6 48 ÷ 6 = 8 8 × 7 = 56 7 × 8 = 56 56 ÷ 8 = 7 56 ÷ 7 = 8 8 × 8 = 64 8 × 8 = 64 64 ÷ 8 = 8 64 ÷ 8 = 8 8 × 9 = 72 9 × 8 = 72 72 ÷ 8 = 9 72 ÷ 9 = 8 8 × 10 = 80 10 × 8 = 80 80 ÷ 8 = 10 80 ÷ 10 = 8 8 × 11 = 88 11 × 8 = 88 88 ÷ 8 = 11 88 ÷ 11 = 8 8 × 12 = 96 12 × 8 = 96 96 ÷ 8 = 12 96 ÷ 12 = 8

They should be able to answer these questions in any order, including missing number questions e.g. $8 \times \bigcirc = 16$ or $\bigcirc \div 8 = 7$.

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You do not need to practise them all at once; perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

Songs and Chants – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable.

Double your fours – Multiplying a number by 8 is the same as multiply by 4 and then doubling the answer. $8 \times 4 = 32$ and double 32 is 64, so $8 \times 8 = 64$. Five six seven eight – fifty-six is seven times eight ($56 = 7 \times 8$).

Use memory tricks – For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.
