

# Home Learning Grid – Year 3 W/B 13.07.20

Write a letter to your <b>new</b> teachers. Introduce yourself, tell them a few things you like about school and what hobbies you enjoy. This will really help them get to know you!	If you have any worries about going back to school in September, write them down and send them to Miss Mathews! I can either pretend I'm the worry monster and gobble them all up or I can reply with some friendly advice :)	Draw a picture of you and all of your classmates at school! Can you remember to add everyone's features e.g. hair colour, height etc?	Read 'The Day the Crayons Quit'. If you don't have this book, watch this: <a href="https://www.youtube.com/watch?v=jTbINnIW4sI">https://www.youtube.com/watch?v=jTbINnIW4sI</a>	Use painting software to mix different colours together (on my laptop, it's called 'Paint'). You could also use Purple Mash to do this.
Think back on your time in Year 3 and come up with <b>3</b> of your <b>favourite memories</b> . One of mine was our Geevor trip, or watching you all try to pick up jelly with chopsticks (pencils) to test friction!	Watch the video that Miss Mathews made (on our class page) with all the pictures of us over the past year. Think back to all the lovely times that we've had together!	Here are <b>some</b> of the topics you will cover next year: Space, Local Culture (Cornwall), Water and Ancient Greece. Which one(s) are you most excited to learn about and why?	Draw pictures of <b>5</b> objects using very unusual colours and label them (e.g. a blue strawberry, a green dog).	Find out the cost of <b>3</b> different sets of crayons. Work out the cost of each crayon in the sets. Which set is the best value?
Write a list of <b>4</b> things you have <b>improved</b> on this year (e.g. x tables, growth mindset, AR score etc) and why you are happy you have improved in these areas.	Write a list of <b>4</b> things you think you need to <b>work on</b> when you go back to school in September (e.g. practising spellings, capital letters etc) and why you think it is important to focus on these areas.	Write a list of some of the afterschool clubs you would like to see our school start in September! Sports? Computing? Origami?	Yellow and orange crayons have an argument about the colour of the sun. What colour is the sun? Prove it by giving at least <b>3</b> valid points!	Learn about colour blindness. How does this affect some people?
