

## Our Solar System

### What do you need to do?

1. Colour (or write down the colours) in the circles in the correct colour for each planet or object.
2. Add rings to the planets that have them.
3. Write down how many moons each planet has.
4. Show any other special features.

The Earth has been completed for you.

Write down/colour in the planets in the correct colours

Mercury

Write here how many moons the planet has

Venus

Blue  
Green  
Yellow  
Brown  
White

Earth

Mars

Write down/colour the planets,  
asteroid or comet in the correct colours

Write here how many  
moons the planet has
